

THE
Abortion Survivors
NETWORK

You are there for **HER** We are here for **YOU**

As the abortion pill is becoming more widely available pregnancy centers will see more failed abortions and Abortion Pill Reversal cases. Currently, we estimate 1,734 per year in America. We've experienced the impact that follows. These unique situations need an extra layer of sensitivity and long term emotional support. We can help!

5 reasons to partner with Abortion Survivors Network as a pregnancy center:

- Training for your staff
- Support for your center
- Resources for the woman and their survivor baby long term
- Referrals to your center
- Connection to support if the abortion pill reversal doesn't work as hoped

Who We **ARE**

The Abortion Survivors Network is the only support and advocacy organization worldwide for the babies who have survived abortion and their families. Since 2019, the Abortion Survivors Network has connected with nearly 650 survivors, healing them with healing groups, empowering them with community support, and equipping them to find and use their voice.

Where you see abortion survivors in the media, at events, or in policy hearings, the Abortion Survivors Network is the driving force.

TIPS for how to help a woman who experiences failed abortion or has taken the abortion reversal pill:

DO

- Do offer empathy and that you are there to help
- Do acknowledge that her emotions may feel complex
- Do let her know that she is not alone
- Do let her know that support groups with other women exist
- Do assess and address the circumstances that lead to abortion
- Do offer reliable and accurate information about her medical options
- Do reach out to medical, mental health, and social worker support
- Do encourage her to follow through with medical treatment plan
- Do reach out to ASN for referral to our programs or ask questions
- Do share with ASN about a survivor for reporting purposes

DON'T

- Don't tell her other women who love to be in her position
- Don't coerce her to make an adoption plan
- Don't underplay her feelings or tell her what to feel
- Don't underestimate the fact that the internet and medical professionals recommend a second abortion after a first has failed
